CONTINGENCY KIT LINE K

CrunchOil[®]
HYDROCARBON ABSORBENTS

The CONTINGENCY KIT is a set of basic equipment and materials contained in a PVC transport bag for the control of emergencies derived from leaks or spills that allow a quick intervention. It can also be used as a preventive element in operational facilities.

In addition to the absorption elements, the kit consists of protective equipment for the operator and elements for the removal of the resulting waste. Ideal equipment for transport vehicles, industrial and road emergencies, mining and oil vehicles, very practical and efficient in maintenance and lubricant centers.

Given the diversity of possibilities where spills can occur, three specific kits have been designed with the appropriate elements for each case.

The equipment has a set of CRUNCH OIL absorbent products that uses Loose Fiber as a base to guarantee the efficiency of operations where, depending on the product, absorption ranges greater than 5 times the volume of fiber contained in each product can be achieved.

This is due to the particular structure of the fiber. Likewise, complementary equipment has been provided as personal protection equipment, equipment to contain the waste, and elements for the global management of the event (picks, shovels, generators, measuring equipment, lighting, and other equipment).

PHYSICAL AND CHEMICAL PROPERTIES

- Physical appearance: greenish blue fiber.
- Specific weight: 0.20-0.22
- Humidity: 5.5%.
- Residue by ignition: 4% ash.
- Inert materials: 0.5%.
- PH: 7 (Neutral)
- Flash Point: 280 - 290 ° C
- Absorption capacity: 5 to 8 times its own weight (depending on the characteristics of the absorbed substance)

ADVANTAGES

- Great absorption capacity and performance.
- Highly hydrophobic (repels water).
- Fireproof: it only carbonizes from 280°C, and it does not generate a flame.
- Due to its encapsulation capacity, it does not leach, avoiding indirect contamination.
- 100% biodegradable and natural.
- Ecological and friendly to the environment.
- Dries clean, without the need to use water.
- Non-toxic in its original form (non-polluting fibers).
- Easy-use, easy-application and high-absorption speed.
- There is no expiration date, but it is recommended to use the product within 3 years from the packing date.

CONTINGENCY KIT LINE K

LIMITATIONS

In the presence of strong acids or alkalis, although it maintains its absorption capacity, it must be removed quickly, since it can be chemically attacked. As it is an organic material, it is necessary to carry out a compatibility test for its use. See the list of substances already tested.

STORAGE

It is advisable to store it in dry places, keeping the containers closed and preferably placed on pallets.

PRESENTATION

Code	Product (Container Measurements)	Contents	Weight (approx.)
110526	K6000 (L:600mm – D:400 mm)	1 loose fiber bag x 6 kg., 2 socks, 2 pillows, 2 pairs of nitrile gloves, 1 shovel, 1 brush, 2 waste bags.	13 kg
110519	K5000 (L:600mm – D:400 mm)	6 loose fiber bags x 1 kg., 1 sock x 2,50 m, 1 sock x 5 m, 1 pillow, 4 pairs of nitrile gloves, 1 shovel, 1 brush, 4 waste bags.	13 kg
110502	K3000 (L:500mm – H:400 mm) Width150 mm	1 loose fiber bag x 1 kg., 1 sock x 2,50 m, 1 pillow, 1 pair of nitrile gloves, 1 waste bag	5 kg
