TEMPORARY STORAGE POOL

Heavy PVC POOL, portable and with fast assembly, suitable to be used with hydrocarbons, and ideal for use as transfer tool and provisional storage of fuels in case of tank rupture or for maintenance.

It has a floating collar that allows it to fill it up without the need of any structure, rising automatically as the liquid enters.

CHARACTERISTICS AND ADVANTAGES

- Resistant to hydrocarbons and interference.
- Easy to assemble and fold.
- Seals formed with high frequency
- Bag for transport.
- It does not require structure.
- Self-supporting
- Easy cleaning
- Quick to unload with 2" stopper.
- In the event that hydrocarbons are stored after use, it is advisable to clean it with the absorbent Loose Fiber CrunchOil®.

PRESENTATION

Code	Product	Storage capacity
110700	PAT P 0,5	500 l (120 cm diam x 50 cm height)
110717	PAT P 1	1000 l (150 cm diam x 90 cm height)
110724	PAT P 5	5000 l (280 cm diam x 85 cm height)
110748	PAT P 10	10000 l (350 cm diam x 110 cm height)

The storage capacity of the pools can vary depending on the customer's requirements.

FINAL DISPOSAL

In the case of using Loose Fiber for the cleaning of the pool, the waste generated can be sent to final disposal through incineration or landfills according to the current legislation of each site.
