DES-MAX

Virucidal Bactericidal Disinfectant

DES-MAX is an excellent bactericidal, virucidal, fungicidal and sanitizing disinfectant to be used in schools, hospitals, clinics, restaurants, supermarkets, school canteens and in any food area.

APPLICATIONS

DES MAX does not contain detergents; its active compounds are 5th generation quaternary ammonium.

DES-MAX is bactericidal against:

- Staphylococcus Aureus.
- Salmonella Choleraesuis.
- Pseudomona Aeruginosa.

DES-MAX is a powerful virucide against a wide variety of viruses, including COVID-19.

SUGGESTED USES

DES-MAX can be used by mopping, spraying or immersion. It acts immediately.

Rinsing is necessary when the surface will be in direct contact with food.

Water dilution rates recommended are:

- For disinfection (as bactericide, virucide, fungicide): 1:50
- For general cleaning: 1:100
- For its use in disinfection cabins: 1:200

SPECIFICATIONS

- PH concentrated: 8.5 a 9.
- Active compounds: 5th generation quaternary ammonium.
- Does not contain fragrance.
