# HAND SANITIZER GEL

Antiseptic and antibacterial product designed to be used as a complementary hand-cleaning product after washing hands with soap and water.

Formulated with ethyl alcohol to provide an effective disinfectant and sanitizing action, no need for subsequent rinsing, removing from this way up to 99.98% of the pathogenic bacteria.

Being a fluid with high viscosity, it does not spill easily, which facilitates its use on the areas to be cleaned. It also has greater durability on surfaces thanks to its highest density, increasing its effectiveness.

Ideal to be used in home cleaning, hospitals, clinics, infirmaries, banks and some food industries.

## SUGGESTED USES

- Apply a bit of the hand sanitizer gel CrunchOil® on hands and interdigital spaces, rub and let it dry.
- Subsequent rinsing is not necessary.
- For external use only.

## SPECIFICATIONS

- Appearance: Colorless gel.
- Smell: Characteristic of alcohol.
- pH: 7.0 - 8.0
- Active ingredient: Ethyl alcohol 70%
